

The standard OpenFiber installation is quick and painless.

## Installation Process: A Quick View

### 1 Scoping Visit

We'll contact you to confirm a time to meet at your home. We'll discuss the installation process and agree on the best locations for the fiber equipment to be fitted, and will arrange the details of subsequent visits.

 Allow 1 hour

### 2 Exterior Visit

One of our crews will carry out outside work on your property in order to physically connect your home to our fiber network that runs down your street.

 No need to be home

### 3 Connection Visit

We'll meet you at your home to install the internal equipment and get your connection up and running. You can then start enjoying the awesome benefits of fiber!

 Allow 3-4 hours
